

Find the most suitable murine oncology models for your preclinical studies

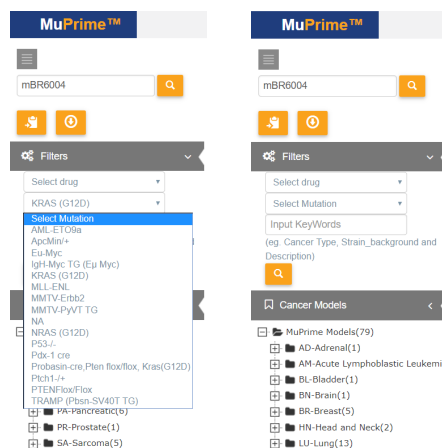

MuBase is CrownBio's easy to use online database of murine and humanized drug target models which enables side-by-side comparison and selection to fit your individual needs.

- Access a variety of murine research models including:
 - Syngeneic models
 - MuPrime™
 - GEMM
 - HuGEMM™.
- Review model and profiling data:
 - Model background
 - Mouse strain
 - Histopathology
 - Genomic profiling (RNAseq)
 - Benchmark treatment (including immuno-oncology agents).
- Perform advanced genomic searches (expression, fusion, mutation) across CrownBio's immuno-oncology platform.
- Easy access and registration for new and current CrownBio Database users:
 - New users can register at mubase.crownbio.com
 - Current database users can log in now, using their CrownBio credentials.
