Crown Bioscience **Corporate Brochure**

About Us

Crown Bioscience, a JSR Life Sciences company, is a global drug discovery and development services company providing translational platforms to advance oncology, immunology, inflammation, and metabolic disease research.

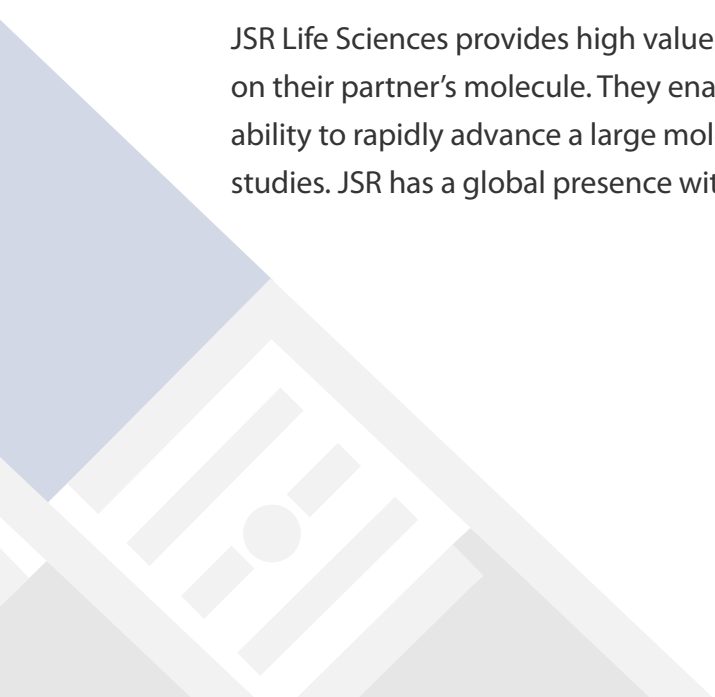

With an extensive portfolio of relevant *in vivo* and *in vitro* models and predictive tools, Crown Bioscience enables clients to deliver superior clinical candidates. We provide our clients with the therapeutic expertise, expansive capabilities, operational excellence, and customer-centric flexibility they need to optimize and support their drug discovery and development programs.

About JSR

JSR Life Sciences is the large-molecule expert providing the biopharmaceutical industry integrated drug development and manufacturing solutions, from large-scale *in vitro* and *in vivo* drug candidate efficacy studies, to the clinical and commercial supply of biologics.

The company is focused on helping translate their customer's innovative science into life-saving medicines.

JSR Life Sciences provides high value to the industry by keeping a single chain of custody on their partner's molecule. They enable their customers to serve patients better with their ability to rapidly advance a large molecule from early experiments all the way to clinical studies. JSR has a global presence with 28 sites and offices in 7 countries.

Our Mission

Our mission is to empower our customers to improve human health.

We do this by engaging the finest scientific talent, upholding the highest quality standards, and relentlessly pursuing innovation.

Everyday we strive to accelerate and de-risk drug development to help realize a world where every patient gets the right treatment at the right time.

Our Vision

Together we can realize a world where every patient gets the right treatment, at the right time.

Our Core Values

Our Leadership Team

Experience Matters

The leadership team at CrownBio has a deep understanding of the pharmaceutical industry, and significant experience in building and operating businesses and major departments within the top US Pharmaceutical's R&D and preclinical programs.
